## Under Construction

## TopMoSt

The manual of mobility for apprentices in the craft

## ToPMoSt...

(Tool to promote mobility of students)

**...is an international project to promote the mobility of apprentices in skilled crafts**

### **Target group:**

Apprentices of all trades from the electrical and metal sector, who are willing to spend a part of their education abroad.

We are currently developing a handbook with our international partners. It allows you to learn training sections in one of our partner countries.

Our partner countries are

- Spain
- Netherlands
- Turkey
- England
- Italy

Lifelong learning is the most important feature to secure a professional future and it's expanding your way in personal and professional terms.

We are currently developing a handbook with our international partners; it allows you to learn specifically training sections in one of our partner countries.

Our partners offer you the opportunity to continue your education for a period of time in factories or operating facilities of the partner country. You'll not only get this insight into the working life of your foreign colleagues, but also learn country and its people.

If interested, our local partners organize the internship, the accommodation and the accompanying program, so that your stay will be made as diverse as possible.

A care and support by our colleagues in the countries is ensured.

We can help you to reduce language barriers.

However, your school English skills are well suited for the stays.

**Think forward!**

**Knowledge is power!**

**Put the pedal to the metal!**

**Garbage in, Garbage out!**

**The proof of the pudding is in the eating!**
